

## Reduce your carbon footprint with this post-mix alternative to concrete

- Techno-Crete is an environmentally friendly alternative to cement based concrete post mix
- A 2 part hydrophobic polyurethane blend from recycled oils from the cooking industry and sustainable grown mineral oils.
- Design life 50+ years
- Pack size – 1.8kg satchel (includes Part A & B)
- Forms a structurally supporting foundation in 10 minutes
- Applications:
  - \* Fencing
  - \* Holding rails
  - \* Signs
  - \* Markers
  - \* Trough systems
  - \* CCTV masts
  - \* Signals
  - \* Hoardings
- Environmentally friendly
- Logistics/storage and handling significantly better than cement concrete
- Efficient installation
- Significant carbon footprint saving - > 80% CO<sub>2</sub>
- Civil design support
- Accepted on Network Rail, UK since 2018
