

GREENCORE NOISE WALL

GreenCore Noise Wall is a high performance and sustainable Noise Wall that combines lightness with high strength and aesthetics.

It is manufactured from 100% recycled mixed plastics which delivers a significant carbon footprint reduction compared to concrete pre-cast panels.

- ▶ 66% reduction in embodied carbon from manufacturing
- ▶ 74% reduction from transport

Features and benefits:

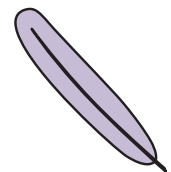

- ▶ Design life 50 plus years
- ▶ High impact resistance, extended durability and superior acoustic performance
- ▶ Environmentally friendly
- ▶ Compliant with all State Transport Authority requirements
- ▶ Lightweight to transport and efficient install
- ▶ Low life cycle costs
- ▶ Different size options available
- ▶ Locally manufactured using local plastic waste

Very low CO2 footprint

High mechanical strength

Light weight

Durable

50 year design life

Low life cycle cost
