

TUFDUCT CABLE MANAGEMENT SYSTEM

Tufduct Cable Management System is an environmentally friendly & sustainable cable management system to carry high voltage and communication cables that is manufactured from 100% recycled plastic.

It's versatile design enables configurations horizontally, vertically, any angles, around obstructions, elevated and as walkways.

Features and benefits:

- ▶ 50 year design life
- ▶ Versatile design
- ▶ Environmentally friendly and sustainable – made from 100% recycled plastic
- ▶ Light Weight (one person lift) – transport & handling benefits
- ▶ Wide range – internal capacities from 90mm to 430mm
- ▶ Anti-vandal and anti-theft features
- ▶ Retrofittable with existing systems

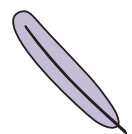

100% Circular

Very low CO2 footprint

High mechanical strength

Light weight

Low life cycle cost

50 year design life
