

# PRISMA ANTI-TRESPASS SYSTEM

IN-TRACK AND OFF-TRACK

**NEW AND INNOVATIVE MODULAR DETERRENT SYSTEM FOR USE IN-TRACK AND OFF-TRACK. PRISMA IS MANUFACTURED FROM 100% RECYCLED TYRES AND IS FULLY RECYCLABLE.**

The PRISMA modular deterrent system is an effective solution to the problem of undesired and unauthorised rail access by trespassers and vandals. The panels' pyramid structure presents a convincing obstacle with its staggered heights, making it very difficult to walk over.

### Specification

- Modular panels with male/female interlocking system
- Dimensions – 1200mm x 580mm
- In track – 140mm high (weight 42kg)
- Off track – 292mm high (weight 49kg)

### Features

- Manufactured from recycled materials
- High visible staggered pyramid design
- 100% recyclable
- Durable material
- Light weight
- Simple 2 person installation with existing hand tools
- Tested to temperatures from -30 to 70 degrees
- Non electrically conductive
- Fire resistant
- Maintenance free

### Benefits

- Sustainable solution
- Environmentally friendly
- 100% fully circular – reduces landfill; can be recycled and used to make new product
- Low life cycle cost
